My name is Megan Lentin. My 4yo, female, spayed, chipped, cat has gone missing. She was last seen by my housemates on the 13th of April 2024 at our place on Coombe Road, Plumstead. Domestic short hair. Green eyes. Brown and black tortoiseshell with white paws, nose and belly. Pink nose and paw pads with a black oval spot
on her left back paw pad. A "J" shaped mark on her forehead. 2 white rings around the tip of her tail. Her top right canine tooth is slightly shorter than the left after the vet
shaved down a chip. She is very small for an adult cat and her tail is proportionally quite short for her body. Please contact with ANY information.
